Simone Fiorentini

Personal Profile

I'm a 23 years old web developer. I have experience in designing, developing, testing and debugging user interfaces. I successfully completed several courses described below and managed to work comfortably with HTML, CSS, JavaScript, React, and Node.js. I use daily Npm, Sass, Git, GitHub and MongoDB. The major libraries in my works are: Express, Mongoose, EsLint, Nodemon, MaterializeCSS, Jest and GSAP. I'm currently learning Redux, GraphQL and Typescript.

Core Technologies

HTML	React
CSS	Node.js
JavaScript	MongoDB

Tools

Jest	Sass
EsLint	Git
Npm	GitHub

Major Libraries

Express	Axios
Mangoose	Bootstrap
Nodemon	MaterializeCSS
GSAP	

Learning

Redux

GraphQL

TypeScript

Projects

GitHub Job Finder
A React application using the GitHub Jobs API to fetch and filter job posts in real time. The app uses hooks, Axios, and pagination to organize the job posts in batches of 50.

See the code

Book Library
A CRUD application using real-time databases and user authentication from Firebase. It allows users to add books personal library, mark them as read and sync data across devices.

See the code

Phonebook
A back-end focused CRUD React app using Node.js and a MongDB database. The single-page-app runs on a Node.js server, that serves as a middleware between the front-end and the database. The app also provides a fully functioning RESTful API that can be used independedntly to fetch or post data, without using the front-end.
